

JOB DESCRIPTION

Job Title: Graduate Software Developer

Reporting To: Technical Director

Purpose: To develop quality web-based software applications on behalf of ICONI Software and the company's clients. The post will also entail support of our current products developed using Microsoft Internet technologies.

Ref: ICGD12

Main Duties:

- Design and development of quality software and web applications on behalf of ICONI Software and the company's clients.
- Design and development of product ideas for ICONI Software using web and Internet technologies.
- Design and development of ICONI Software internal systems using web and Internet technologies.
- Provide support for ICONI Software's internal and external products.
- Represent ICONI Software in a professional manner via email, on the telephone and in person with our clients.
- Further develop the ICONI Software code library and software framework.
- To assist in the maintenance and development of the company's ISO9001:2008 and ISO27001 Integrated Quality and Information Security Management System.
- To familiarise, help implement and enforce the company's Management System Policies.
- Contribute to the wider business initiatives of ICONI Software.
- To regularly report to management on performance and activities.
- Any other reasonable duties required by Management.
