Job Title: Software Developer (IC18SD2)

ICONI Software is seeking a highly-motivated Software Developer to join our growing team. The successful person will join our development team delivering innovative web-based customer solutions to help change people's lives. They will be passionate about their work and enjoy being part of a tight knit team delivering high quality software solutions.

Main Duties:

- Contributing to Technical Design Sessions, Code Reviews and Estimation via Planning Poker Session

- Developing our next generation of customer solutions within our CEP Software framework

- Advise on the estimated effort and technical implications of User Stories

- Identifying innovative Technical Solutions meeting user requirements

- Unit Testing, Verification and Code Reviews to ensure compliance with quality standards

- Contribute to all stages of the Development Lifecycle including Analysis, Design, Coding, Testing and Release

- Regular reporting and communication with Management regarding progress of on-going projects and tasks

- Contribute to the wider business initiatives and perform other duties required by the company.

- Actively promote and participate in knowledge sharing activities.

- Contribute to future product direction through design and development of product ideas and internal software

- Communicate with our Service Desk on Production issues, providing solutions and workarounds where possible

The Ideal Person:

- A minimum of 1-2 years' experience in software development as a .Net Developer (ASP.Net, C#) and SQL Server

- Experience of applying development best practices and patterns across multiple layers of a web application

- Experience in building solutions utilising programming languages and web development technologies such as **Microsoft C#, ASP.Net, WebAPI 2, T-SQL**, **jQuery, Angular** (or related JavaScript frameworks)**, Visual Studio** and **SQL Management Studio**

- Be innovative, enthusiastic and have a passion for creating intuitive and engaging applications for our customers

- Self-motivated to learn new technologies, skills and remain current with the latest Industry technology trends

- Have excellent communication, organisational, problem-solving skills and take pride in the quality of their work

- Able to work flexible hours as required and be prepared to travel throughout the UK/Ireland

In return, we offer an excellent working environment, laptop, rapid skills acceleration including on the job training and vast exposure to all stages of the lifecycle of a software solution.

If you think this position is right for you and your CV demonstrates the required specification, send your CV to:
